

Biotech Internship Project Dissertation by **ADEETECH[®]**

Difference between Final Year Dissertation Project and Hands on Internship

Final Year Dissertation Project

1. Duration: Min 3 to Max 6 months for B.Sc. B.Tech., M.Sc. and 8 to 12 months for M.Tech. in Biotechnology or any life sciences.
2. Original research work and that should be conducted by student in our laboratory and will be published in NCBI database, this proves that this is the original work, its duration and its validity.
3. Individual project (no requirement of batch), resulting in final year hard copy of thesis
4. Fees: Rs. 10000 / Rs. 15000/ Rs. 20000 plus 18% GST per month per student depending on basic project Vs premium project, only thesis Vs thesis with NCBI DNA / protein database publication i.e. content based.

Hands on Internship

1. Duration: 2 Months only. Irrespective of any degree.
2. No research work, only hands on practical to gain practical experience of particular service we provide as our primary business/ in some cases no practical only review writing or any assignment given by lab in charge to prove internship e.g. bioinformatics i.e. *insilico* work
3. Only in batch (min 5 students to max 20). (Maximum 25 at any time point), resulting in no thesis, only experience certificate. Successful completion of bioentrepreneurship i.e. biotech internship will be provided.
4. Fees: Rs. 20,000 per student (Discount available for batch of 10 to 20 student as a group admission).
